

clean and simple

Grinder Pump Do's and Don'ts

Sewage grinder pumps take solids and liquids from your toilets, sinks, dishwasher, tubs, washing machine, etc.; grind it into slurry and pump to the main line leading to the treatment facility. It is important that you take care not to put items into the system that would be damaging to the pump. These items should not be placed into the sewer system:

Grease Cooking Oil Metal Tampons Rags Socks
Cloth Plastic Condoms Seafood Shells Egg Shells Diapers
Depends Sanitary Napkins Paint Sand Oil Cat Litter

In addition, you must **never** introduce into any sewer:

Medicines Strong chemicals Lubricating oil and/or grease
Flammable material Gasoline

Damage to Grinder Pump by any of these items voids the warranty.

Periods of Disuse: If your home or building is left unoccupied for longer than a couple of weeks, perform the following procedure:

Purge the System: Run clean water into the unit until the pump activates. Immediately turn off the water and allow the grinder pump to run until it shuts off automatically.

Duplex Units: Special attention must be taken to ensure that both pumps turn on when clean water is added to the tank.

Caution: Do not disconnect power to the unit

Power Failure: Your grinder pump cannot dispose of wastewater without electrical power. If electrical power service is interrupted, keep water usage to a minimum.

Pump Failure Alarm: Your Environment One grinder pump has been manufactured to produce an alarm signal in the event of high water level in the basin. The installer must see that the alarm signal provided is connected to an audible and/or visual alarm in such a manner as to provide adequate warning to the user that service is required. During the interim prior to the arrival of an authorized service technician, water usage must be limited to the reserve capacity of the tank. **For service, please call 251/971-3022.**

BCSS will disconnect sewer service for non-payment. There is a \$400.00 reconnect fee due on all disconnected accounts.

I have read and understand these requirements.
